BODDINGTON'S QUALITY SWEET PEAS

We are headquarters for all the latest and most up-to-date varieties of Sweet Peas, and make a specialty of this grand annual. Our collection has been thoroughly revised, synonyms and out-of-date varieties have been eliminated, wherever practical, and only those of real merit retained.

The Spencer or Orchid-flowering types are exceedingly popular and all the varieties that we offer can be relied upon to come true to color and description. The "Unwins" are all good, and many grandiflora varieties are still holding their own.

If collections are wanted for exhibition purposes, we shall be glad to make suggestions.

THE AMERICAN SWEET PEA SOCIETY'S SILVER MEDAL was awarded for our display at the society's Boston Exhibition, July 13 and 14, 1912, and at the exhibitions of the NATIONAL SWEET PEA SOCIETY OF AMERICA, held at New York City, July 7 and 8, 1909, and July 12 and 13, 1910, we were awarded C. C. MORSE CO.'S SILVER CUP for the finest exhibit of Sweet Peas. *Open to the trade only.*

1913 NOVELTY SWEET PEAS

Owing to the exceptional weather in California and Europe the past season, a great many Novelty Sweet Peas which were intended to have been sent out this year are being withheld, for the reason that it has been impossible to secure enough stock to put them on the market. However, we have been able to secure small stocks of the following varieties which we can thoroughly recommend. All have been thoroughly tried and are "set." The descriptions are those of the raisers.

Charm (Burpee). The flowers are all of good size and most of the strong, stiff stems bear four flowers each. Of the finest Spencer type, they are throughout a glistening, pure snow white, suffused equally through standard and wings with delicate flesh or blush pink. Pkt. of 40 seeds 20 cts., 6 pkts. \$1.00.

Agricola (Bolton). The color is a pleasing shade of blush, suffused rosy lilac. One of the largest and best-shaped Sweet Peas we have for exhibition. This was one of the novelties that helped me to win the Silver Cup for new varieties at the N. S. P. S. Show. Pkt. of ten seeds 25 cts., 5 pkts. \$1.00.

Andrew Aitken (Bolton). Is from a cross between Earl Spencer and Coronation. The color is a lovely terra cotta pink. Greatly admired when exhibited, and will be in great demand for exhibition and table decoration. Pkt. of ten seeds 25 cts., 5 pkts. \$1.00.

Mrs. E. Cowdy (Bolton). I have no hesitation in saying that it is absolutely the largest and strongest-growing maroon yet introduced for exhibition, and will easily take first place in the maroon section. It is a huge flower of beautiful shape; the standard literally glows and glistens in the sun. Pkt. of ten seeds 25 cts., 5 pkts. \$1.00.

Bertrand Deal, Improved (Deal). Award of Merit, National Sweet Pea Society, 1912. Pale, rosy lilac; of immense size. Pkt. of fifteen seeds 25 cts., 5 pkts. \$1.00.

Bolton's Scarlet (Bolton). After years of work among the scarlets, I have pleasure in offering a true scarlet that will not burn in the hottest sunshine. A strong grower, throwing plenty of four-flowered sprays. Pkt. of ten seeds 25 cts., 5 pkts. \$1.00.

May Perrett Spencer (Malcolm). Buff-pink self, with crimson calyx and footstalks, which give the flowers depth and warmth and increase their charm and character. Absolutely sunproof. Pkt. of twelve seeds 25 cts., 5 pkts. \$1.00.

Snowdon (W. & S.). The flowers of this new white variety are large, of the very finest form, beautifully waved, and of the purest white. As a florist's flower it should be in great demand, as we believe it to be of greater substance than any other existing white-waved variety. Pkt. 25 cts., 5 pkts. \$1.00.

Collection of eight varieties \$1.75. Three collections for \$5.00.

Remember the Sweet Pea Exhibition in connection with the International Flower Show, New York City, April 5 to 12, 1913, also the American Sweet Pea Society's Annual Exhibition in Boston, Mass., July, 1913. Schedules and information upon application.

Are you a member of the American Sweet Pea Society? If not, you should send for an application blank. The annual dues are \$2; life membership, \$25. By becoming a member you are entitled to the report of the Sweet Pea trials of Cornell University, Ithaca, N. Y., Bulletins 219 and 220, which give very exhaustive tests on Winter and Outdoor growing of Sweet Peas. These tests, which have been under the supervision of Prof. Beal, will be published in the future; and it will be a most comprehensive and exhaustive work, covering experiments with fall and spring sowing, and other valuable tests. For further information, write to the secretary, Harry A. Bunyard, 342 West Fourteenth Street, New York City.

Spencer Varieties and Recent Introductions

Sweet Peas are extremely scarce this year and in some instances our stocks are limited to a few pounds. Customers are advised to order early and save disappointment. Do not be misled by cheaper offers; our stock is true to type and free from rogues.

The Spencer varieties of Sweet Peas are fast superseding the Grandiflora types of the same variety and color, and are indispensable in a collection whether for exhibition or cut flower purposes. The following list is the cream of the beautiful creations of the hybridizer's art, and can be relied upon to come true to type and description.

Boddington's Flower Seed Novelties and Specialties

INTRODUCTIONS OF 1911 AND 1912

While every year we look upon the flower seed novelties placed upon the market with more or less skepticism, we must not overlook the fact that all the really good things of today were novelties at one time, and were looked upon with as much, or perhaps more suspicion than the novelties of today. There are many novelties offered this year from different sources, but it is our endeavor to select only those we know something about, have seen, or that are highly recommended from sources other than the disseminator. The descriptions are those of the introducers. You cannot afford to be without some of these really good introductions.

Asterum

Asterum A splendid new type of the Hohenzollern Aster, of immense size, center very full. The following is the description by the raiser, Albert A. Sawyer: "The plant itself grows straight up with very strong, sturdy stems, starting near base and reaching from 18 to 24 inches. The three colors are unsurpassed: the lavender has never been produced before, the pink is the beautiful pink of the rose, and the white is as white as the driven snow. All these qualities of the **Asterum** are the result of painstaking selection extending over a period of eight years. Each plant yields from ten to fifteen blooms, and their solidity is such that they make good shippers."

Offered in three colors only: Pink, tr. pkt., 25 cts.; Lavender, tr. pkt., 25 cts.; White, tr. pkt., 25 cts. Collection 1 pkt. each, 60 cts.

Single Aster, Southcote Beauty H.A. The flowers have long, perfectly formed petals and very small, golden-yellow centers. They are carried on long, stiff stems

from 12 to 20 inches in length. The colors include beautiful shades of pink, as well as blue and pure white. **Southcote Beauty** is of great value as a border plant, attaining a height of 2 to 2½ feet, and is probably unrivaled by any other Aster for cutting and house decoration. Tr. pkt. 15 cts., 5 pkts. for 60 cts., ¼ oz. 50 cts.

Apera arundinacea H.P. The Pheasant's Tail, or Silver Fountain Grass from New Zealand.

A very beautiful grass and a valuable border plant; hardy perennial; height 2 feet. Trade pkt. 15 cts.

Aquilegia coerulea candidissima H.P. A charming new Columbine, which differs from the existing whitish long-spurred kinds with colored spurs, by the uniform, pure, snowy whiteness of the entire bloom. The latter is just as large and as long-spurred as that of the type-form, *Cœrulea*, and is further distinguished by beautiful and characteristic light green foliage. Trade pkt. 25 cts., 5 pkts. for \$1.00.

BODDINGTON'S FLOWER SEED NOVELTIES AND SPECIALTIES—Continued

Aquilegia, Rose Shades H.P. Long-spurred exhibition strain; very beautiful. Trade pkt. 35 cts., 3 pkts. for \$1.00.

Antirrhinum majus grandiflorum, Venus H.H.P. A delicate pink tint has hitherto been wanting among the tall, large-flowering Snapdragons, and this is just the color most in demand at the present time for cutting and making up. Trade pkt. 20 cts., 6 pkts. for \$1.00.

Balsam, Improved Camellia-flowered, Primrose H.A. It forms strong plants about 2 feet in height, thickly studded with large flowers of a clear yellow, a much superior tint to that already offered as "light yellow." Trade pkt. 25 cts., 5 pkts. for \$1.00.

Begonia gracilis, Mignon H.H.P. A charming bedding Begonia, profusely covered with brilliant blooms of fiery scarlet; height 7 to 8 inches. Trade pkt. 25 cts., 5 pkts. for \$1.00.

Calceolaria, Boddington's International Exhibition Strain S.P. The seed of this strain was collected from the prize-winning plants shown at the International Horticultural Exhibition, London, 1912, and as seen by our Mr. Bunyard. He considered them the finest collection of plants and varieties ever staged. We offer a limited quantity of this seed at \$2.00 per trade pkt., 3 pkts. for \$5.00.

Ostrich Plume Celosia, Pride of Castle Gould H.A.

AWARDS: Large Silver Medal at the National Flower Show, Chicago, Ill., 1908; First-Class Certificate, New York Florists' Club, 1907; Special Diploma of Merit at the Mineola Fair, 1907; and numerous first premiums.

The Ostrich Plume Celosia, "Pride of Castle Gould," is an entirely distinct type of the Celosia pyramidalis plumosa, and surpasses by far anything thus far placed on the market. This strain has, through constant culture and careful selection and hybridization, proven its superiority to anything similar ever offered. The following strong points speak for themselves:

HABIT OF PLANT. Pyramidal compact growth of from 2 to 3 feet, with immense, extra-fine, feathered heads, give the plant a most striking and unique appearance.

COLOR. The plumes are of many beautiful self-shades, including Blood Red, Carmine, Golden Yellow, Salmon, Deep Scarlet, Dark Orange and Wine Red.

DECORATIVE VALUE. As a pot-plant, with its quick-growing habit, we believe there is no finer plant known at the present time, wherefrom in the course of six months a most excellent stock of salable plants in every size can be obtained. As a bedding plant it cannot be equaled by any other annual for its profusion of flowers and variety of striking colors. We offer seed raised strictly from pot-grown plants. **PRICE, PER PACKET, 25 CENTS, 5 FOR \$1.00.**

Cineraria grandiflora nana, Stella H.H.A. Star-shaped flowers, the coloring of which surpasses anything ever seen in Cinerarias; there are the lovely and rare cornflower blue tints in profusion, rich crimson and blood red in dazzling variety, deep rose and shell pink, most delicate peach-blossom and cream-colored shades quite new to Cinerarias. About 250 seeds in a packet. Trade pkt. \$1.00, ½ pkt. 60 cts.

Cosmos, Crimson Ray H.A. The petals are narrow and fluted, separated in star-like form, and of the most brilliant crimson overlaid with a velvety sheen. The plants grow 4 to 5 feet in height, are most profuse in bloom, and the flowers are so striking and elegant that it will be acknowledged one of the most artistic plants of recent introduction. Trade pkt. 20 cts., 3 pkts. for 50 cts.

The Great Cyclamen, Mrs. Buckston G.B. It is not often that a Cyclamen is honored by the Award of Merit from the Royal Horticultural Society, but the exception in this case well merits the award. Cyclamen Mrs. Buckston is of a real salmon color, a lovely tint somewhat more delicate than found in our Salmon King. The flowers are immense, larger than anything we have seen before, but, in spite of the size, are most freely produced, and the plants also being excellent growers we have in this lovely variety the last word in Cyclamen, without which no collection will be complete. Trade pkt. 75 cts., 3 pkts. for \$2.00.

Dimorphotheca aurantiaca (Orange Daisy). H.A. No one with a garden, no matter how small, should be without this lovely, useful, rare and extremely showy annual from Namaqualand, South Africa, which will soon become a great favorite in all countries on account of its easy culture and beautifully colored flowers. Its Marguerite-like blossoms, 2½ to 2¾ inches in diameter, show a unique, glossy, rich

Primula Malacoides alba

orange gold, which brilliant coloring is rendered the more conspicuous by the dark-colored disc surrounded by a dark zone. A bed in full bloom is a magnificent sight. Trade pkt. 15 cts., 3 pkts. for 40 cts., ¼ oz., \$1.00.

Dimorphotheca aurantiaca hybrida H.A. These hybrids are similar in habit and size of bloom to the beautiful Dimorphotheca aurantiaca, but range in color from pure white to bluish white with salmon glow and orange-salmon reverse, creamy white with lemon reverse, bluish with chrome and brown reverse, lemon with deep brown reverse, canary yellow, soft salmon and salmon orange. Trade pkt. 25 cts., 5 pkts. for \$1.00.

Dimorphotheca sinuata (Dinter). H.A. Equally useful and of the same culture as the Dimorphotheca aurantiaca hybrida introduced by us last season, this new South African species distinguishes itself essentially by the singularly pretty color of its flowers. They are 2½ to 2¾ inches across, and show a uniform, clear satiny buff or light chamois, with a bluish disc when fully open in sunshine; the reverse of the petals is purplish red. This rare coloring is quite distinct and new and cannot be found among the many beautiful tints in yellow and salmon yellow of our Dimorphotheca aurantiaca hybrida. The plants are 12 to 15 inches high, and form regularly branched bushes, densely covered with numerous flowers. Foliage light green, obtuse, sinuate. Novelty of great merit. Trade pkt. 35 cts., 3 pkts. for \$1.00.

Helianthus cucumerifolius purpureus H.A. A real "Red Sunflower." This variety is not an Echinacea or Rudbeckia, but a Helianthus. The flowers of this novelty vary from light pink to deepest purple. The form of the flower is the same as the variety Cucumerifolius. This cannot be recommended too highly for cutting. Trade pkt. 25 cts., 5 pkts. for \$1.00.

Lupinus annuus (Annual Lupins). H.A. The popularity of Annual Lupins is responsible for the introduction of the following six new shades, which should be grown in every up-to-date garden:

Boddington's Blue Bird. Celestial blue. Tr. pkt. 10 cts., oz. 75 cts.

Boddington's Parquette. Bright scarlet, white tip. Trade pkt. 10 cts., oz. 75 cts.

Boddington's Oriole. Combined yellow and blue. Trade pkt. 10 cts., oz. 75 cts.

Boddington's Flamingo. Giant pink; tall; showy. Trade pkt. 10 cts., oz. 75 cts.

Boddington's Snowbird. Pure white. Tr. pkt. 10 cts., oz. 75 cts.

Boddington's Cockatoo. Dwarf; salmon pink. Trade pkt. 10 cts., oz. 75 cts.

BODDINGTON'S FLOWER SEED NOVELTIES AND SPECIALTIES—Continued

Solanum Capsicastrum Melvini

New Collection of Named Delphiniums

THE WORLD'S BEST H.P.

We have imported from England seed of the best twenty-nine varieties and offer as follows: Trade pkt. 25 cts., 5 pkts. for \$1.00; or one pkt. each of the 29 varieties for \$5.00. For names and full descriptions see our retail garden guide, mailed free upon application.

Myosotis alpestris elegantissima coerulea fl. pl.

H.P. Double-flowered variety of the blue pyramidal-growing Alpine Forget-Me-Not, which after repeated trials, has turned out to come nearly true (90 to 95 per cent.) from seed. Height of the plants, 8 to 9 inches. The double flowers preserve their freshness a long time. Trade pkt. 25 cts., 5 pkts. for \$1.00.

Pepper, B.'s Bird's-Eye H.H.P. This is a miniature Pepper, bearing a great profusion of scarlet berries well above the foliage. This proves an invaluable plant for Christmas, and is easily grown. Trade pkt. 15 cts., 2 pkts. for 25 cts., oz. \$1.00.

Petunia, Erskine Park Belle H.A. This is a remarkably pretty Petunia, raised by Mr. E. J. Norman, gardener to Mrs. George Westinghouse. The color is deep rose pink—flowers as large again as our Bar Harbor Beauty, and slightly frilled; an excellent variety for bedding or for borders, and if seed-pods are removed will bloom the whole Summer. Knowing this variety personally, we can highly recommend Erskine Park Belle. Trade pkt. 25 cts., 5 pkts. for \$1.00, 1-16 oz. for \$2.50.

Tritoma hybrida mirabilis A new strain of dwarf-growing Tritomas, or Kniphofias, obtained by artificial hybridizing. Its great merit as a novelty consists in producing flowers in abundance the first year from being sown, so that this new class may justly be called "annual" Tritomas. If sown in temperate heat from January to February, pricked off and treated like half-hardy annuals or like Pentstemon Hartwegii, the seedlings may be planted in the open ground from the end of April to May, and they will bloom freely and constantly from July until late in the Autumn. The flower-stems, 2 to 3 feet high, rising above the graceful, grass-like foliage, produce neat, slender spikes $4\frac{1}{2}$ to 6 inches in length, thickly set with tubular flowers, which range in color from light citron yellow to deep golden yellow and from light orange scarlet, including remarkably pretty tints. The long-stemmed flower spikes, of which two and more are developed on the same shoot, may be used for any decorative purpose. A group of this new strain of Torch Lilies or Red Hot Poker Plants in full bloom presents a beautiful aspect. To be recommended as quite new and a real acquisition. Trade pkt. 35 cts., 3 pkts. for \$1.00.

Solanum Capsicastrum Melvini

(NEW SOLANUM)

Brilliant Scarlet, Conical-shaped Berries

Awarded a First-Class Certificate by the Massachusetts Horticultural Society, also by The Boston Gardeners and Florists' Club.

A very bushy, compact plant, 12 to 15 inches high, covered with brilliant scarlet, conical-shaped berries about $\frac{1}{2}$ inch in diameter, each berry standing well above the dense, dark foliage, making it one of the best Winter decorative plants ever introduced, and a money-maker for the florist at Christmas. Seed sown in January or February will produce fine specimen plants full of fruit for the holidays. Trade pkt. 25 cts., 5 pkts. for \$1.00.

Primula fimbriata, Giant Queen Alexandra

G.P. The largest white Primula Sinensis, blooms measuring $2\frac{1}{2}$ inches across. Petals very solid and erect. Robust foliage with red stems. $\frac{1}{2}$ pkt. 60 cts., trade pkt. \$1.00.

Primroses and Polyanthuses

Polyanthus, Barr's Exhibition. Highly colored strain; the result of many years' selection; saved only from richest reds and dark crimson. Trade pkt. 25 cts., 5 pkts. for \$1.00.

Polyanthus, Barr's Exhibition, Yellow Varieties. Saved from rich yellow flowers of finest form. Trade pkt. 25 cts., 5 pkts. for \$1.00.

Polyanthus, Barr's Exhibition, White Varieties. Saved from large-flowered whites of finest form. Trade pkt. 25 cts., 5 pkts. for \$1.00.

Primrose-Polyanthus, Munstead Giant Strain. A grand new strain of Primrose-Polyanthus, bearing large trusses of well formed flowers, ranging in color from soft, pale yellow to the richest and deepest orange, also pure whites with dark orange or pale lemon centers. Trade pkt. 25 cts., 5 pkts. for \$1.00.

Primrose, "Inglescombe." A fine selected strain of true Primrose. Trade pkt. 25 cts., 5 pkts. for \$1.00.

Primula, New Hybrid Queen of Roses A lovely new hybrid of *P. obovata* and *P. stellata*, producing shapely heads of large and beautiful, bright rose-colored flowers, remaining decorative for a long time. 1 foot. Trade pkt. \$1.00, $\frac{1}{2}$ pkt. 60 cts.

Primula Malacoides · H.H.P. (The Giant Baby Primrose). The plants branch very freely. The flowers, which are $\frac{3}{4}$ inches wide, are of a pretty light lilac, and are borne in whorls on long stems. If grown in a greenhouse, can be had in bloom in four months after sowing. Trade pkt. 50 cts., 3 pkts. for \$1.25.

Primula Malacoides alba The white prototype of the foregoing variety, and a great acquisition; very chaste and beautiful as a plant or cut flower. Trade pkt. 50 cts., 3 pkts. for \$1.25.

Pyrethrum, Comet-flowered (*P. roseum* hybridum grandiflorum). H.H.P. The flowers are large—2 to 3 inches across—either single or semi-double, and of the most bizarre form, the petals being rolled, twisted, or sometimes tangled together. Pure white through flesh color and rose to brilliant carmine and blood red. Trade pkt. 25 cts., 5 pkts. for \$1.00.

New Giant Snapdragon, "Purple King" (Antirrhinum maximum). A splendid and sensational novelty. The proud Antirrhinum grandiflorum, whose size had put into the shade every variety previously produced, is superseded immensely by this New Giant Snapdragon. With its immense, deep and glowing purple flowers this splendid Snapdragon will doubtless become the pioneer of a new "Giant Class," of very decorative value. Trade pkt. 25 cts., 5 pkts. for \$1.00.

Viola cornuta, Rose Queen H.P. Large-flowered "Horned Pansy," with deep, rosy lilac flowers, essentially different from the *V. cornuta* rose-lilacina. Being a continuous bloomer, it is very effective in flower beds. Trade pkt. 25 cts., 5 pkts. for \$1.00.

Zinnia, Double Giants (*Z. grandiflora robusta plenissima*). H.A. The following are truly Giant Zinnias with beautiful, large, double flowers, $4\frac{1}{2}$ to 6 inches in diameter. **Sulphur Yellow, Flesh Color, Crimson, Violet, Purple, White, Golden Yellow, Scarlet.** Trade pkt. 20 cts., 3 pkts. for 50 cts. Collection, 1 pkt. each 8 varieties for \$1.50

The following six beautiful varieties are seedlings of the well-known Daybreak and Purity and have found much favor and demand among most up-to-date florists; strongly recommended on account of their free-blooming propensities and beautiful shades. Trade pkt. 25 cts., ¼ oz. \$1.00, oz. \$3.50.

Yellow (Lemon Drop)

Pink Improved (America)

Salmon (Salmon King)

Rose (Rosy Morn)

Lavender

Blue (Blue Bird)

The Favorite Color beautiful blush, changing to rich deep pink as the flower becomes older; the petals wavy reflexed. Trade pkt. 25 cts., ¼ oz. 75 cts., oz. \$2.50.

Purity Double flowers of glistening pure white; similar to Daybreak in form and habit of growth. Trade pkt. 25 cts., ¼ oz. 75 cts., oz. \$2.50. (See illustration.)

Aster, Lady Roosevelt The flowers resemble the incurving Chrysanthemum; the color is a gorgeous pink, of marvelous beauty. The mammoth growth of plant insures extra-long stems; 20 to 30 inches long is very ordinary for Aster Lady Roosevelt, and the flowers are very large. Trade pkt. 25 cts., ¼ oz. 75 cts.

Vick's Mikado White An entirely new class of Branching Asters, growing from 16 inches to 2 feet high, and bearing immense curled and twisted flowers on long, stiff stems, resembling at a distance, huge, ragged, Japanese Chrysanthemums. Trade pkt. 25 cts., ¼ oz. 75 cts., oz. \$2.50.

Vick's Mikado Pink Extremely fine shade, well set on stiff, long stems; companion to Mikado White. Trade pkt. 25 cts., ¼ oz. 75 cts., oz. \$2.50.

Snowdrift Certainly one of the earliest Asters in cultivation. The entire energy of the plant seems given to the production of slender, upright stems 12 to 20 inches long, crowned with immense feathery flowers. Trade pkt. 25 cts., ¼ oz. 75 cts., oz. \$2.50.

ASTERS—Continued

Cardinal The color is, as its name implies, a beautiful shade of cardinal. One of the very best varieties for cutting purposes. Trade pkt. 25 cts., ¼ oz. 75 cts., oz. \$2.50.

Sunset A seedling from Daybreak. The color of the flowers is a delicate shade of light pink, shading to a rich pink in the center, making a beautiful combination of colors in one deep flower. The flowers are globe shaped and are borne on long stems in profusion. Trade pkt. 25 cts., ¼ oz. 75 cts., oz. \$2.50.

Crimson King Color a very rich blood crimson, full of fire, making a brilliant bed or border, and very desirable for cutting, the color showing up well under artificial light. Trade pkt. 25 cts., ¼ oz. \$1.25, oz. \$4.00.

CALCEOLARIA HYBRIDA

Boddington's Perfection

The herbaceous Calceolaria is an easily cultivated plant. So long as frost is excluded from the plants in Winter they are perfectly safe, and to attempt to hasten growth at any time is a failure. July is the best month for sowing the seed. The great advance made in the habit of the strains offered is remarkable, whilst in the colors there is a marked improvement. Saved by England's most famous specialists. Monster flowers of rich and varied colors, including spotted, laced, blotched and self-colored varieties. ½ pkt. 60 cts., pkt. \$1.00.

Boddington's Matchless CINERARIAS

In the culture of the Cineraria the one mistake so often made is that of sowing the seed too soon. The plants thus raised, more often than not, make a rank growth; this is not in any sense desirable. By sowing in May and June plants large enough for all decorative purposes can be had. In after treatment the aim should be to secure as hardy a growth as possible. Sturdy plants with leaves of medium size are best.

CULTURAL DIRECTIONS

Take a clean 5 or 6-inch pot, or 6 to 7-inch pan, and fill it to within 2 inches of the top with coarse ashes; on top of this put about 1½ inches of fine soil and firm down; give good watering with boiling water, using a fine rose; after drying off a little, sow the spores but do not cover, put in a saucer filled with water, placing a pane of glass over the pot or pan. Never top-water. After first real leaves appear they should be pricked out into flats.

A pretty half-hardy annual, forming compact bushes about 2½ feet in height, with small feathery light green drooping foliage, which changes, as the Summer advances, to a deep green and to a crimson hue in September. Seed may be sown in March, giving the same treatment as for Balsam or other similar annuals, care being taken to secure a good drainage, as it is sometimes slow in germinating; or seed may be sown in April and theseedlings planted out two feet apart in the open border about the end of May. Quality Florists' Flower Seeds, Our Specialty

BODDINGTON'S MATCHLESS

GIANT PRIMULAS

PRIMULA SINENSIS

Our *Primula Sinensis* seed has been specially grown for us by the most celebrated English Primula specialist. The flowers are remarkable, not only for size, beauty and brilliancy of the colors, but for the great substance of the petals. Considerable care is necessary in order to secure the successful germination of the seed of the choice kinds of *P. Sinensis*. The most suitable periods for sowing are January to May for Autumn, and June to August for Spring blooming. Shallow pans, well drained, are the best, the soil consisting of sandy loam and leaf-mold, worked through a fine sieve; the pans when thus prepared, should be well watered before the seed is sown. Only a slight covering of soil or sand is needed. What has most to be guarded against is drought; the soil should be kept in an equable degree of moisture as possible, never being on the dry side. We attribute more failures to this cause than to any other. Just at the time when the seed commences to germinate the least departure from this is fatal.

PRIMULA OBCONICA GIGANTEA

The following varieties are vast improvements on the old type of *P. obconica*, being freer flowering and of sturdier habit. In habit and foliage they resemble the beautiful *P. cortusoides*, and it is one of the most useful Primulas for pot culture or for the open border during the Summer months. To obtain good plants for Winter and early Spring flowering, the seed should be sown in warmth the previous April or May, and wintered in a cool greenhouse or frame.

GLOXINIA ERECTA SUPERBISSIMA

Having during the past season been requested to secure some specially fine Gloxinias for exhibition purposes, we have made arrangements with a noted Gloxinia specialist in England to reserve for us some of the most distinct types. The bulbs are not so large as the Named Varieties, but this is a characteristic of most Erecta superbissima varieties.

- BODDINGTON'S IDEAL PRIZE GIANT MIXED.** Great variety of superb colors.
- CYCLOPS.** Velvety carmine, shading to a broad white border, throat dotted with dark red.
- DUCHESS OF YORK.** Flowers of a rich dark blue, each petal being edged with a broad band of white. A most striking and lovely variety.

SPOTTED HYBRIDS. Whenever exhibited, they create intense interest. The delicate markings, in an infinite variety of forms, add a special charm to the flowers.

SUTTON'S WHITE. A giant white flowered variety.
DUKE OF YORK. Large scarlet Gloxinia with deep white edge to each petal. A magnificent flower.

HER MAJESTY. This exquisite Gloxinia is still unsurpassed by any other white variety. The flowers are as pure as newly fallen snow, and are borne on short stems, just clear of the elegantly recurved foliage.

READING SCARLET. In color this is the most brilliant Gloxinia in existence, being an intense glowing scarlet variety of the true Crassifolia habit. An admirable companion to Her Majesty.

GOLIATH. Violet and white, fine variety.
Per doz. \$1.50, per 100 \$10.00.

Grand Novelty Orchid-flowered Gladiolus

MRS. FRANK PENDLETON, JR. Order early to procure Mrs. Frank Pendleton, Jr. Awarded First-Class Certificate of Merit by the Massachusetts Horticultural Society of Boston and by the American Gladiolus Society at Baltimore, 1911. Its color is the most exquisite salmon-pink with a very conspicuous blood-red blotch in the throat on the lower petals. Per doz. \$4.50, per 100 \$35.00.

KUNDERDI "GLORY"

has "distinctiveness" stamped all over it. Broad-expanded, wide-open flowers, paired by twos, face all in the same directions, and are carried on straight, stout stalks never less than 3½ feet in height. From four to eight flowers are open at one time. The form: each petal is exquisitely ruffled and fluted at the edges, such as is only noticeable in Orchids. The color is delicate cream-pink with a neat, attractive crimson stripe in the center of each lower petal. Per doz. 75c., per 100 \$5.00, per 1000 \$48.00.

GLADIOLUS "PEACE"

The flowers are large, of good form and correctly placed on a heavy, straight spike. They are a beautiful white, with a pale lilac feathering on the inferior petals.

"Peace" is not an early bloomer, but rather medium to late, and planted at the same time with other stock, it is in its best condition when most other varieties have passed blooming. Per doz. \$1.50, per 100 \$10.50, per 1000 \$100.00.

PINK AUGUSTA. Color a lovely soft pink. This variety is especially suitable for forcing under glass, for which purpose it is especially recommended. Per doz. 35c., per 100 \$2.50, per 1000 \$20.00.

Lycoris squamigera, or Amaryllis Halli

(THE MAGIC LILY OF JAPAN)

A perfectly hardy Amaryllis, producing beautiful pink flowers.

Lycoris squamigera produces in early Spring foliage which grows until July, when it ripens off and disappears, and one not familiar with its habits would think the bulb had died, but about a month later, as if by magic, the flower-stalks spring from the ground to a height of 2 or 3 feet, developing an umbel of large and beautiful lily-shaped flowers 3 to 4 inches across and from eight to twelve in number, of a delicate lilac-pink.

Very useful for cut flowers in the Summer.

Hybrid Roses, Crimson Ramblers, Etc.

The right time to buy Roses is when they are fresh and well ripened. Roses potted up in the Winter become better established and force better, and are more satisfactory in every way, and you can retard or force at your leisure. We recommend the American-grown "Ramblers." Don't attempt to force imported Ramblers; the general experience is that they are failures.

NOVELTY ROSES

We take much pleasure in offering the following Roses. Our Mr. Harry A. Bunyard, while attending the International Horticultural Exhibition in London, last Summer, made many copious notes, not only at the great show, but also at the nurseries he visited, with the result that we are cataloguing the Roses we consider the best for American gardens—varieties that will be great acquisitions. The stock we offer is all two years old, English field-grown and will flower absolutely the first year of planting. All our Roses are imported and packed in bundles of five; this facilitates handling and is to your advantage. For a larger list of Roses, see our 1913 Garden Guide; mailed free upon application.

JULIET

This, perhaps, is the most distinct Rose ever introduced for color, which is unique. It is of the same type as Soleil d'Or, Rayon d'Or and other Austrian Briers and their hybrids. It was introduced by Wm. Paul & Son in 1910. These types require very little pruning; simply remove dead and useless wood. The following is the raiser's description: "Outside of petals old-gold, interior rich rosy red, changing to deep rose as the flowers expand. A very distinct and attractive novelty, blooming both in Summer and Autumn. Large and full, of powerful and delicious fragrance; most beautiful." 50 cts. each, \$2.00 for 5, \$35.00 per 100.

RAYON D'OR

One of Pernet-Ducher's greatest hybrids. Cadmium yellow as the bloom begins to open, toning to sunflower yellow when fully expanded. Fine, bronze-green foliage, glossy and absolutely immune from the attacks of mildew. Flowers large, full, of fine, globular form; superb. 60 cts. each, \$2.75 for 5, \$50.00 per 100.

EXCELSA—A VALUABLE CLIMBER

This variety created a sensation at the National Flower Show, Boston, 1911, and the Royal International Exhibition, London, 1912. The flowers are double, bright scarlet, produced in large clusters—"a Climbing Rose everyone should have in their garden." Also an excellent forcing variety. 50 cts. each, \$2.00 for 5, \$35.00 per 100.

THE FLORISTS' EXCHANGE PREMIUM CLOCK

A REGULATOR EIGHT-DAY CALENDAR CLOCK

We have had one of these clocks running in our office here in New York for over two years—and it is good. It is a correct timekeeper and an ornament for the hall of your house or to hang in your office. It is so cheap that you could even afford to place one in the potting shed.

It is a big clock, standing 38½ in. high, has a 12 in. dial and runs eight days with one winding. A calendar attachment, regulated once each month, will give you the days of the month. The case is of solid oak, richly embossed. The clock is thoroughly guaranteed when it leaves the hands of the makers, who are one of the largest clock manufacturing firms in the country.

We offer you this opportunity to secure one of these clocks because we think them so useful and so low in price. We really think this clock so good a proposition that we would like you to have one.

We are not allowed to sell these clocks, but we can offer them as a premium, and do so, as per the following:

The Regulator Clock and The Florists' Exchange one year, \$3.90
The Regulator Clock and The Florists' Exchange two years, \$4.75

Remit by cheque or post office money order.

NOTE:—As three of these clocks can be forwarded by freight at the same cost as one only (the three weighing under 100 lbs.), it will pay you to send in three subscriptions for one delivery to the same freight office at \$3.90 each, and divide the freight cost. Subscribers may be new or renewal.

Each clock is packed in a wooden case, f.o.b. at the factory, Forestville, Conn., weight 30 lbs. Your local agent can advise you just what the freight charges will be.

(ESTABLISHED IN 1886)

The one truly great trade paper of the United States in its line. Why? Because it is in full sympathy with its readers, knows what they want and gives them what they want. The result is: "Once a subscriber, always a subscriber." As an advertising medium for Florists, Seedsmen, Nurserymen and Allied Industries, it produces results unexcelled by any competitor.

We print herewith our clock advertisement. If you are already a subscriber in good standing and wish to have one of these Clocks, you can remit us \$3.90 now and have your subscription extended for one year from date of expiration. If you do not happen to be a subscriber, but are in the trade, remit us \$3.90, and we will send you The Florists' Exchange one year and one of these fine clocks, the biggest value ever offered, and of which several hundred have been taken as premiums without one dissatisfied subscriber.
